Summary

Graduated 10 years ago and looking for an oportunity to come back into IT. I have a good educational background and some basic programming skills but a lack of expierience. At student years i was passioned in researches of cognitive processes and brain modeling. Learning my sychology to create thinking and understanding machines with own World model. It transformed into   interest to psychology and psychotherapy so i'm a kinda emphatic person.

Started C++ GlobalLogic BaseCamp but it was interrupted by war :(

Now i'm on my way to Software Developer position.
